Proteins

Isolation, by partial pepsin digestion, of the three collagen-like regions present in subcomponent C1q of the first component of human complement.
By K. B. M. Reid 5

Subunit composition and structure of subcomponent C1q of the first component of human complement.
By K. B. M. Reid & R. R. Porter 19

Physicochemical characterization of proteolytic cleavage fragments of bovine colostral immunoglobulin G_1 (IgG_1).
By W. D. Fang & T. K. S. Mukkur 25

Fb'_2, a new peptic fragment of human immunoglobulin G.
By D. M. Parr, G. E. Connell, D. I. C. Kells & T. Hofmann 31

Interactions of the lanthanide- and hapten-binding sites in the Fv fragment from the myeloma protein MOPC 315.
By R. A. Dwek, D. Givol, R. Jones, A. C. McLaughlin, S. Wain-Hobson, A. I. White & C. Wright 37

The purification of the glycoprotein lectin from the broad bean (*Vicia faba*) and a comparison of its properties with lectins of similar specificity.
By A. K. Allen, N. N. Desai & A. Neuberger 127

The binding of calcium to a salivary phosphoprotein, protein A, common to human parotid and submandibular secretions.
By A. Bennick 163

Effect of succinylation (3-carboxypropionylation) on the conformation and immunological activity of ovalbumin.
By S. A. Kidwai, A. A. Ansari & A. Salahuddin 171

Nucleic Acids

The mechanism of sensitivity to phleomycin in growing *Escherichia coli* cells.
By M. J. Sleigh & G. W. Grigg 87

Conformational analysis of deoxyribonucleic acid from PM2 bacteriophage. The effect of size on supercoil shape.
By A. M. Campbell 101

PAGE

Lipids

High-performance liquid chromatography of phosphatidylcholine and sphingomyelin with detection in the region of 200nm.
By F. B. Jungalwala, J. E. Evans & R. H. McCluer 55

Carbohydrates

2-*O*-Methyl-D-glucuronic acid, a new hexuronic acid of biological origin.
By J. H. Kieras, F. J. Kieras & D. V. Bowen 181

Enzymology

Dehydrogenation of the phosphonate analogue of glucose 6-phosphate by glucose 6-phosphate dehydrogenase.
By P. R. Adams, R. Harrison, T. D. Inch & P. Rich 1

pH-dependence of the steady-state rate of a two-step enzymic reaction.
By K. Brocklehurst & H. B. F. Dixon 61

Some properties of a microsomal oleate desaturase from leaves.
By C. R. Slack, P. G. Roughan & J. Terpstra 71

A new non-functional form of milk xanthine oxidase containing stable quinquivalent molybdenum.
By D. J. Lowe, M. J. Barber, R. T. Pawlik & R. C. Bray 81

Purification, characterization and identification of rat liver histidine–pyruvate aminotransferase isoenzymes.
By T. Noguchi, E. Okuno, Y. Minatogawa & R. Kido 107

Interaction of human cathepsin D with the inhibitor pepstatin.
By C. G. Knight & A. J. Barrett 117

Nitrogenase of *Azotobacter chroococcum*. Kinetics of the reduction of oxidized iron-protein by sodium dithionite.
By R. N. F. Thorneley, M. G. Yates & D. J. Lowe 137

Partial purification and characterization of collagen galactosyltransferase from chick embryos.
By L. Risteli, R. Myllylä and K. I. Kivirikko 145

State and accessibility of zinc in yeast alcohol dehydrogenase.
By V. Leskovac, S. Trivić & M. Latkovska 155

RAPID PAPERS

PAGE

Proteins

N-Terminal amino acid sequence of wheat proteins that lack phenylalanine and histidine residues.
By D. G. Redman 193

Nucleic Acids

Comparison between the ribosomal ribonucleic acids from free and membrane-bound ribosomal fractions of HeLa cells.
By M. S. N. Khan & B. E. H. Maden 197

PAGE

Enzymology

Formation of angiotensin III by angiotensin-converting enzyme.
By A. T. Chiu, J. W. Ryan, J. M. Stewart & F. E. Dorer 189

Electron-paramagnetic-resonance studies on the molybdenum of nitrate reductase from *Escherichia coli* K12.
By R. C. Bray, S. P. Vincent, D. J. Lowe, R. A. Clegg & P. B. Garland 201

Studies on human *N*-acetyl-β-D-hexosaminidase C separated from neonatal brain.
By G. T. N. Besley & D. M. Broadhead 205

Contents of Volume 155, No. 2

FULL PAPERS

PAGE

Proteins

Mouse haemoglobin beta chains. Sequence data on embryonic γ chain and genetic linkage of the γ-chain locus to the adult β-chain locus *Hbb*.
By J. G. Gilman 231

The actin of muscle and fibroblasts.
By P. J. Anderson 297

A comparison of the properties of renin isolated from pig and rat kidney.
By M. Lauritzen, J. J. Damsgaard, I. Rubin & E. Lauritzen 317

The mechanism of folding of globular proteins. Suitability of a penicillinase from *Staphylococcus aureus* as a model for refolding studies.
By B. Robson & R. H. Pain 325

The mechanism of folding of globular proteins. Equilibria and kinetics of conformational transitions of penicillinase from *Staphylococcus aureus* involving a state of intermediate conformation.
By B. Robson & R. H. Pain 331

Active fragments obtained by cyanogen bromide cleavage of ovomucoid.
By J. G. Beeley 345

The molybdenum–iron protein of *Klebsiella pneumoniae* nitrogenase. Evidence for non-identical subunits from peptide 'mapping'.
By C. Kennedy, R. R. Eady, E. Kondorosi & D. K. Rekosh 383

PAGE

Nucleic Acids

The circular dichroism of ribosomal ribonucleic acids.
By R. A. Cox, W. Hirst, E. Godwin & I. Kaiser 279

Appendix: Calculation of the circular dichroism of bihelical ribonucleic acids as a function of nucleotide composition.
By R. A. Cox & W. Hirst 292

Lipids

Polar-group behaviour in mixed monolayers of phospholipids and fusogenic lipids.
By B. Maggio & J. A. Lucy 353

Preparation of the 3-monosulphates of cholic acid, chenodeoxycholic acid and deoxycholic acid.
By E. S. Haslewood & G. A. D. Haslewood 401

Carbohydrates

The structures of the carbohydrate moieties of the α subunit of human chorionic gonadotrophin.
By J. F. Kennedy & M. F. Chaplin 303

Small Molecules

Bilirubin conjugates in bile of man, rat and dog. Semi-quantitative analysis of bile composition by thin-layer chromatography.
By B. A. Noir 365

GENERAL BOOKBINDING CO.
75 378AA 2 013 1 C 3854
QUALITY CONTROL MARK

PAGE

Synthesis and separation by thin-layer chromatography of bilirubin-IX isomers. Their identification as tetrapyrroles and dipyrrolic ethyl anthranilate azo derivatives.
By N. Blanckaert, K. P. M. Heirwegh & F. Compernolle 405

Enzymology

A cyanogen bromide fragment of β-galactosidase from *Escherichia coli* with α-donor activity in complementation of the enzyme from mutant M15.
By D. V. Marinkovic & J. N. Marinkovic 209

Isolation and properties of α-D-mannosidase from human kidney.
By D. V. Marinkovic & J. N. Marinkovic 217

The concerted inactivation of *Escherichia coli* uridine diphosphate galactose 4-epimerase by sugar nucleotide together with a free sugar.
By P. Blackburn & W. Ferdinand 225

The purification of human enterokinase by affinity chromatography and immunoadsorption. Some observations on its molecular characteristics and comparisons with the pig enzyme.
By D. A. W. Grant & J. Hermon-Taylor 243

Neutral proteinases of human spleen. Purification and criteria for homogeneity of elastase and cathepsin G.
By P. M. Starkey & A. J. Barrett 255

PAGE

Human lysosomal elastase. Catalytic and immunological properties.
By P. M. Starkey & A. J. Barrett 265

Human cathepsin G. Catalytic and immunological properties.
By P. M. Starkey & A. J. Barrett 273

Separation of rat muscle aminopeptidases.
By M. E. Parsons & R. J. T. Pennington 375

Observations on the different substrate behaviour of tropocollagen molecules in solution and intermolecularly cross-linked tropocollagen within insoluble polymeric collagen fibrils.
By F. S. Steven 391

Selective inactivation of the transacylase components of the 2-oxo acid dehydrogenase multienzyme complexes of *Escherichia coli*.
By J. P. Brown & R. N. Perham 419

Spin-label study of the mobility of enzyme-bound lipoic acid in the pyruvate dehydrogenase multienzyme complex of *Escherichia coli*.
By M. C. Ambrose & R. N. Perham 429

Phosphonomethyl analogues of hexose phosphates.
By D. Webster, W. R. Jondorf & H. B. F. Dixon 433

Appendix: A simplified preparation of 2-hydroxy-4-phosphonobutyric acid.
By H. B. F. Dixon & M. J. Sparkes 440

RAPID PAPERS

PAGE

Proteins

The use of ninhydrin as a reagent for the reversible modification of arginine residues in proteins.
By M. F. Chaplin 457

Enzymology

The effect of some analogues of disulfiram on the aldehyde dehydrogenases of sheep liver.
By T. M. Kitson 445

PAGE

The computation of hyperbolic dependences in enzyme kinetics.
By R. K. Airas 449

Kinetic studies on the binding of cyanide to oxygenated cytochrome *c* oxidase.
By T. Brittain & C. Greenwood 453

Preferential inhibition by poly(adenylic acid) of minus-strand synthesis by bacteriophage Qβ ribonucleic acid replicase.
By M. Kondo 461

Contents of Volume 155, No. 3

FULL PAPERS

PAGE

Proteins

Reactions involving superoxide and normal and unstable haemoglobins.
By C. C. Winterbourn, B. M. McGrath & R. W. Carrell 493

The rate of reaction of superoxide radical ion with oxyhaemoglobin and methaemoglobin.
By H. C. Sutton, P. B. Roberts & C. C. Winterbourn 503

A low-molecular-weight protein from rat liver that resembles ligandin in its binding properties.
By B. Ketterer, E. Tipping, J. F. Hackney & D. Beale 511

Study of poly-L-lysine conformations in aqueous methanol solution by using polarized Raman techniques.
By I. W. Shepherd 543

Chymotrypsins from the deer (Cervidae) family. Isolation, partial characterization and primary-structure studies of chymotrypsins A and B from both moose (*Alces alces*) and elk (*Cervus elaphus*) pancreas.
By R. M. Lindsay & K. J. Stevenson 549

[Nitrotyrosyl]cytochrome *c*. Studies of the effect of iron binding, protein denaturants and oxidation–reduction potentials.
By A. J. do Nascimento 589

Isolation of (copper, zinc)-thioneins from pig liver.
By I. Bremner & B. W. Young 631

Ligand–apomyoglobin interactions. Configurational adaptability of the haem-binding site.
By K. E. Lind & J. V. Møller 669

Human placental diamine oxidase. Improved purification of a copper- and manganese-containing amine oxidase with novel substrate specificity.
By M. J. C. Crabbe, R. D. Waight, W. G. Bardsley, R. W. Barker, I. D. Kelly & P. F. Knowles 679

Nucleic Acids

Spectroscopic evidence for the uneven distribution of adenine and uracil residues in ribosomal ribonucleic acid of *Drosophila melanogaster* and of *Plasmodium knowlesi* and its possible evolutionary significance.
By R. A. Cox, E. Godwin & J. R. B. Hastings 465

PAGE

The nature of the 5′-linked 5′ nucleotide sequence at the 5′ end of rabbit globin messenger ribonucleic acid.
By J. A. Hunt & G. N. Oakes 637

Lipids

Lipids associated with bovine kidney glomerular basement membranes.
By G. Kibel, A. Heilhecker & F. von Bruchhausen 535

Small Molecules

The isolation and characterization of bilirubin diglucuronide, the major bilirubin conjugate in dog and human bile.
By E. R. Gordon, C. A. Goresky, T.-H. Chang & A. S. Perlin 477

The determination of methionine in proteins by gas–liquid chromatography.
By G. M. Ellinger & A. Duncan 615

Enzymology

Is a Schiff base involved in the mechanism of the Δ^4-3-oxo steroid 5α- or 5β-reductases from mammalian liver?
By D. C. Wilton 487

Iodination of glyceraldehyde 3-phosphate dehydrogenase from *Bacillus stearothermophilus*.
By G. Allen & J. I. Harris 523

A new method for deriving steady-state rate equations suitable for manual or computer use.
By K. J. Indge & R. E. Childs 567

Thymidine phosphotransferase and nucleotide phosphohydrolase of the fern *Asplenium nidus*. General properties and inhibition by adenosine 3′:5′-cyclic monophosphate.
By A. R. Grivell & J. F. Jackson 571

A method for the purification of milligram quantities of stable human phosphatidylcholine–cholesterol acyltransferase.
By K. G. Varma & L. A. Soloff 583

Molecular forms and activities of glycosidases in cultures of amniotic-fluid cells.
By B. Hultberg, J. Lindsten & S. Sjöblad 595

Purification of phosphodiesterase II from rat and guinea-pig intestinal mucosa.
By P. R. Flanagan & S. H. Zbarsky 607

PAGE

Mode of interaction between β-lactam antibiotics and the exocellular DD-carboxypeptidase–transpeptidase from *Streptomyces* R39.
By N. Fuad, J.-M. Frère, J.-M. Ghuysen, C. Duez & M. Iwatsubo 623

Kinetic and spectral properties of rabbit brain 4-aminobutyrate aminotransferase.
By R. A. John & L. J. Fowler 645

Affinity purification and some molecular properties of human liver alkaline phosphatase.
By J. M. Trépanier, L. E. Seargeant & R. A. Stinson 653

PAGE

Dissociation and catalysis in yeast hexokinase A.
By D. C. Williams & J. G. Jones 661

Effects of arginine and some analogues on the partial adenosine triphosphate–adenosine diphosphate exchange reaction catalysed by arginine kinase. Evolutionary divergence in the mechanism of action of a monomer and a dimer arginine kinase.
By E. O. Anosike & D. C. Watts 689

RAPID PAPERS

PAGE

Proteins

Abnormal carbohydrate composition of the major penetrating membrane protein of En(a–) human erythrocytes.
By M. J. A. Tanner, R. E. Jenkins, D. J. Anstee & J. R. Clamp 701

Removal of adsorbed elastase from partially digested elastin.
By H. P. M. Fromageot & G. M. J. Slusarczuk 705

Nucleic Acids

Modification of brain deoxyribonucleic acid base content with maturation in normal and malnourished rats.
By N. W. Penn 709

Small Molecules

Ascorbic acid, metal ions and the superoxide radical.
By B. Halliwell & C. H. Foyer 697

PAGE

Enzymology

Dihydrofolate reductase and thymidylate synthetase activities in the liver of rabbit foetuses during the haemapoietic period.
By J. R. Bourbon 713

Inhibition of acetylcholinesterase by derivatives of 1,3,2-dioxaphosphorinane 2-oxide.
By D. B. Coult 717

Differences in the degradation of yeast phosphofructokinase by proteinases A and B from yeast.
By K. Huse, G. Kopperschläger & E. Hofmann 721

Autophagy-related changes of arylsulphatases A and B in rat liver lysosomes.
By P. Sanghavi & H. Koenig 725
